29 Here is the graph of $y = x^2 - 2x - 3$

(a) Write down the coordinates of the turning point on the graph of $y = x^2 - 2x - 3$

Lowest point: x = 1 and y = -4.

(1, -4)

1 mark
Turning point (1, –4).

(1)

(b) Use the graph to find the roots of the equation $x^2 - 2x - 3 = 0$

At the roots, y = 0: read the x-axis crossings.

x = -1 or x = 3

-1 and 3

2 marks total
Both roots correct (1 mark for one).

(2)

(Total for Question 29 is 3 marks)
