18 Machine A and machine B both make car parts.

Machine A makes 6 parts every 10 minutes.
Machine B makes 13 parts every 15 minutes.

On Monday
machine A makes parts for 12 hours
machine B makes parts for 10 hours

Work out the total number of parts made by the two machines on Monday.

A: 12 hours = 720 minutes

	Minutes	Parts	
×6	10	6	×6
×12	60	36	×12
	720	432	

1 mark
Scale to one hour.

1 mark
432 parts from A.

B: 10 hours = 600 minutes

	Minutes	Parts	
×4	15	13	×4
×10	60	52	×10
	600	520	

1 mark
520 parts from B.

Total = 432 + 520 = 952 parts

1 mark
952 parts in total.

952

(Total for Question 18 is 4 marks)
