**1** (a) Solve $14n > 11n + 6$

$14n > 11n + 6$

$3n > 6$ (subtract $11n$)

$n > 2$ (divide by 3)

**1 mark**
Isolate the n terms.

**1 mark**
n > 2.

$n > 2$

**(2)**

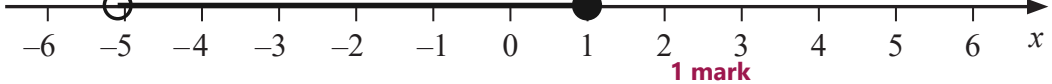

(b) On the number line below, show the set of values of $x$ for which $-2 < x + 3 \leqslant 4$

$-2 < x + 3 \leq 4$

Subtract 3 throughout: $-5 < x \leq 1$

**1 mark**
Subtract 3 from all three sides.

**1 mark**
Join −5 to 1.

**1 mark**
Open −5; closed 1.

**(3)**

**(Total for Question 1 is 5 marks)**
