27 Sean has drawn a time series graph to show the numbers, in thousands, of visitors to a fun park.

Write down two things that are wrong or could be misleading with this graph.

1 The points should be joined by straight line segments, not a smooth curve.

1 mark
One valid criticism.

2 The vertical scale is uneven: the step from 9 to 10 uses the same space as a step of 0.5 elsewhere.

1 mark
A second, different valid criticism.

(Total for Question 27 is 2 marks)
