3 *ABCDE* is a pentagon.

Work out the area of *ABCDE*.

Split into a rectangle and an isosceles triangle.

Half the triangle base = 8 ÷ 2 = 4 cm.

$h^2 = 5^2 - 4^2 = 25 - 16 = 9$

$h = \sqrt{9} = 3$ cm.

2 marks total
Pythagoras
height = 3 cm

Rectangle area = 8 × 4 = 32 cm^2.

1 mark
Find one area

Triangle area = ½ × 8 × 3 = 12 cm^2.

1 mark
Add both areas

Total area = 32 + 12 = 44 cm^2.

1 mark
44 cm^2

..... cm^2

(Total for Question 3 is 5 marks)
