15 Here are two pots.

Pot **A** and pot **B** are mathematically similar.

The area of the base of pot **B** is 160 cm^2.

Work out the area of the base of pot **A**.

Length multiplier from B to A = 8 ÷ 10 = 0.8.

Area multiplier = 0.8^2 = 0.64.

1 mark
Square length multiplier

Area of A = 160 × 0.64 = 102.4 cm^2.

1 mark
102.4 cm^2

..... cm^2

(Total for Question 15 is 2 marks)
