2 Amzol thinks that $(x + 5)^2 = x^2 + 25$ for all values of x.

Is Amzol right?
You must show how you get your answer.

×	x	$+5$
x	x^2	$+5x$
$+5$	$+5x$	$+25$

$(x + 5)^2 = (x + 5)(x + 5)$

$= x^2 + 10x + 25.$

1 mark
Correct expansion

No: the 10x term is missing.

1 mark
No; missing 10x

(Total for Question 2 is 2 marks)
