17 A is the point with coordinates (2, 10)
B is the point with coordinates (5, d)

The gradient of the line AB is 4

Work out the value of d.

Horizontal change = 5 – 2 = 3.

Gradient = vertical change ÷ horizontal change.

1 mark
Use gradient4

$$d - 10 = 4 \times 3$$
$$+10 \qquad +10$$
$$d = 12 + 10$$

1 mark
Rearrange for d

$d = 22$

1 mark
22

$d =$ .....

(Total for Question 17 is 3 marks)
