18 Sophia pays £222 for a plane ticket.
She also pays 100 euros airport tax.

The exchange rate is £1 = 1.38 euros.

What percentage of the total cost of the ticket and the airport tax does Sophia pay for the airport tax?
Give your answer correct to 1 decimal place.

	GBP	EUR	
	1	1.38	
×222			×222
	222	306.36	

Convert ticket to euros:

222 × 1.38 = €306.36.

Total cost = €306.36 + €100 = €406.36.

Airport tax percentage = 100 ÷ 406.36 × 100

= 24.608721...% ≈ 24.6% (1d.p.).
