8 T is an integer such that $7 < T < 15$

(a) Write down the greatest number T can be.

14: T must be an integer strictly below15.

1 mark
14

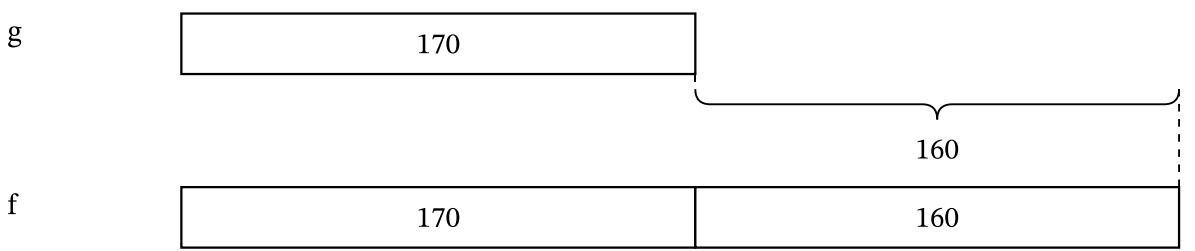

(1)

f and g are both integers.

$f + g = 500$
f is 160 greater than g

(b) Calculate the value of f and the value of g.

1 mark
Remove160

Remove extra160: 500 – 160 = 340; g = 340 ÷ 2 = 170.

1 mark
Halve340

$g =$ .....

f = 170 + 160 = 330. Check: 330 + 170 = 500.

1 mark
f330;g170
