1 A is the point with coordinates (2, 10)
B is the point with coordinates (5, d)

The gradient of the line AB is 4

Work out the value of d.

Horizontal change = 5 − 2 = 3.

1 mark
Gradient4 × run3

$d - 10 = 4 \times 3$

$d - 10 = 12$

$+10$ $+10$

1 mark
Isolate d

$d = 22$.

1 mark
22

$d =$ .....

(Total for Question 1 is 3 marks)
