12 There are 24 girls and 12 boys in a club.

One girl and one boy are going to be chosen to go to a meeting.

Work out the total number of ways of choosing a girl and a boy.

24 choices for the girl; 12 choices for the boy.

1 mark
24 choices ×12

24 × 12 = 288.

1 mark
288

(Total for Question 12 is 2 marks)
