**6**

Work out the value of $x$.

Opposite = x; hypotenuse = 18cm.

$\sin 30° = x \div 18$

(×18) (×18)

$x = 18 \times \sin 30° = 9$ cm.

**1 mark**
SOH:opposite ÷ hypotenuse

**1 mark**
9cm

**(Total for Question 6 is 2 marks)**
