22 In a sale, the price of a cooker is reduced by 50%
At the end of the sale, the sale price of the cooker is increased by 50%

Betty says,

"The cooker is now the same price as it was before the sale."

Is Betty correct?
Explain why.

1 mark
Factors0.5 and1.5

£100 × 0.5 = £50; £50 × 1.5 = £75.

1 mark
0.5×1.5=0.75

No: it ends at75% of the original price.

(Total for Question 22 is 2 marks)
