3 In a sale, the price of a cooker is reduced by 50%
At the end of the sale, the sale price of the cooker is increased by 50%

Betty says,

"The cooker is now the same price as it was before the sale."

Is Betty correct?
Explain why.

£100 → £50 (−50%) → £75 (+50%).

1 mark
Correct two changes

£75 ≠ £100, so Betty is wrong.

1 mark
75%,not100%

(Total for Question 3 is 2 marks)
