11 Polly has a full 5 kg sack of rice.

She pours the rice from this sack into bags.
She fills as many bags as possible.

Each full bag contains 350 g of rice.

(a) How many bags did Polly fill from this sack of rice?

5kg = 5000g.

1 mark
Convert kg to g

g	Bags
350	1
×14 → 4900	×14 → 14

5000 ÷ 350 = 14.2857...

1 mark
Divide by350g

14 full bags.

1 mark
Round down to14

(3)

Polly assumes that the rice from two sacks will fill twice as many bags as the rice from one sack.

(b) Is Polly correct?

You must give a reason for your answer.

Two sacks:10000 ÷ 350 = 28.5714... →28 full bags.

Yes:28 = 2 × 14.

1 mark
Correct for two sacks
