17 Riddington and Greenwick are two small villages.

The population of Riddington has increased from 80 people to 120 people.
The population of Greenwick has decreased from 200 people to 120 people.

Show that Riddington has had the greater percentage change in its population.
You must show all your working.

Riddington increase = 120 – 80 = 40.

$\frac{40}{80} \times 100 = 50\%.$

1 mark
Change ÷ original

Greenwick decrease = 200 – 120 = 80.

$\frac{80}{200} \times 100 = 40\%.$

1 mark
Both percentages

50% > 40%, so Riddington has the greater change.
