11 A road map has a scale of 1 : 30 000

The length of a road on the map is 7 cm.

Work out the length, in kilometres, of the real road.

1 mark
Use scale ×7

Map and real lengths in cm.

1 mark
Convert centimetres

210000cm ÷100 = 2100m.

2100m ÷1000 = 2.1km.

1 mark
2.1km

..... kilometres

(Total for Question 11 is 3 marks)
