16 The accurate scale drawing shows a tree and a wall.

The tree is 15 feet tall.
The tree and the wall are drawn to the same scale.

Find an estimate for the height, in feet, of the wall.

Tree height is about3 times the wall height.

1 mark
Measured factor≈3

Wall ≈15 ÷ 3 = 5feet.

1 mark
About5feet

..... feet

(Total for Question 16 is 2 marks)
