2 A biased spinner can land on red, on blue, on green or on yellow.

John is going to spin the spinner.

The table shows each of the probabilities that the spinner will land on red, on blue or on green.

Colour	red	blue	green	yellow
Probability	0.2	0.25	0.15	0.4

(a) Complete the table.

Known probabilities: 0.2+0.25+0.15=0.6.

1 mark
Subtract total from 1

Yellow = 1−0.6 = 0.4.

1 mark
0.4

(2)

Hayley is going to spin the spinner 60 times.

(b) Work out an estimate for the number of times the spinner will land on red.

Expected reds = 0.2×60 = 12.

1 mark
Probability ×60

1 mark
12 spins

(2)

(Total for Question 2 is 4 marks)
