13 You can use this graph to change between pints and litres.

(a) Change 6 pints to litres.

About 3.4 litres

1 mark
Read across from 6 pints.

..... litres

(1)

(b) Change 16 litres to pints.

L	Pints
4	7

×4: 16 litres = 28 pints

1 mark
Scale a graph reading.

1 mark
28 pints.

..... pints

(2)

(c) (i) Work out the gradient of the line.

Gradient = rise ÷ run

$\frac{4}{7}$ = 0.571428...

1 mark
Use litres over pints.

1 mark
0.57 (approx).

(2)

(ii) What does the gradient of this line represent?

The number of litres per pint.

1 mark
Interpret the units.

(1)

(Total for Question 13 is 6 marks)
