7 A group of children and a group of adults gave an app a score.

1 was the lowest possible score.
5 was the highest possible score.

The incomplete bar chart shows some information about the scores.

2 marks total
Four correct new bars.

Score	Number of children	Number of adults
4	14	6
5	10	9

(a) Complete the bar chart for this information.

(2)

(b) Work out the total number of adults who gave the app a score.

$12 + 10 + 11 + 6 + 9 = 48$

1 mark
Add all five adult bars.

1 mark
48 adults.

(2)

(c) Compare the scores given by the children with the scores given by the adults.

1 10 children and 10 adults gave a rating of 2.

1 mark
Compare equal frequencies.

2 8 more children than adults gave 4 (14 – 6).

1 mark
Compare a difference.

(2)

(Total for Question 7 is 6 marks)
