18 Solve the inequality $2x^2 + x - 3 < 0$
Represent the solution set on the number line.

	x	-1
$2x$	$2x^2$	$-2x$
3	$3x$	-3

$(2x + 3)(x - 1) < 0$

1 mark
Factorise.

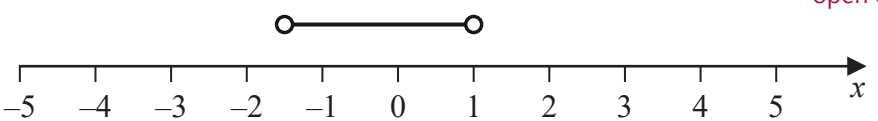

Roots: $x = -1.5$ and $x = 1$

1 mark
Both roots.

Positive quadratic: negative between its roots.

$-1.5 < x < 1$

2 marks total
Between the roots;
open endpoints.

(Total for Question 18 is 4 marks)
