4 (a) Write 1.04×10^5 as an ordinary number.

$1.04 \times 10^5 = 104000$

1 mark
Shift 5 places.

.....

(1)

(b) Write 0.06 in standard form.

$0.06 = 6 \times 10^{-2}$

1 mark
One non-zero digit before point.

.....

(1)

4.62×10^8 tins of beans were sold last year.
These tins of beans cost a total of £300.3 million.

(c) Work out the average cost per tin of beans.

$300.3 \text{ million} = 300.3 \times 10^6$

1 mark
Use matching numerical forms.

$(300.3 \times 10^6) \div (4.62 \times 10^8) = 0.65$

1 mark
0.65.

£.....

(2)

(Total for Question 4 is 4 marks)
