7 On Monday 4 bricklayers took 3 hours to lay a total of 4200 bricks.

On Tuesday there are only 2 bricklayers.

Work out how many hours it will take the 2 bricklayers to lay a total of 3150 bricks.

$4200 \div (4 \times 3) = 350$ per worker-hour

1 mark
Find one worker-hour.

2 workers: $2 \times 350 = 700$ bricks/hour

Hours	Bricks
1	700
4.5	3150

$\times 4.5$ (Hours) $\times 4.5$ (Bricks)

1 mark
Use new rate for 3150 bricks.

$3150 \div 700 = 4.5$

4.5 hours = 4 hours 30 minutes

1 mark
4.5 hours.

..... hours

(Total for Question 7 is 3 marks)
