**16** There are 60 children in Year 6
Each of these children has either a school lunch or a packed lunch.

32 of the children are boys.

$\frac{3}{4}$ of the boys have a school lunch.

$\frac{1}{2}$ of the girls have a packed lunch.

Use this information to complete the frequency tree.

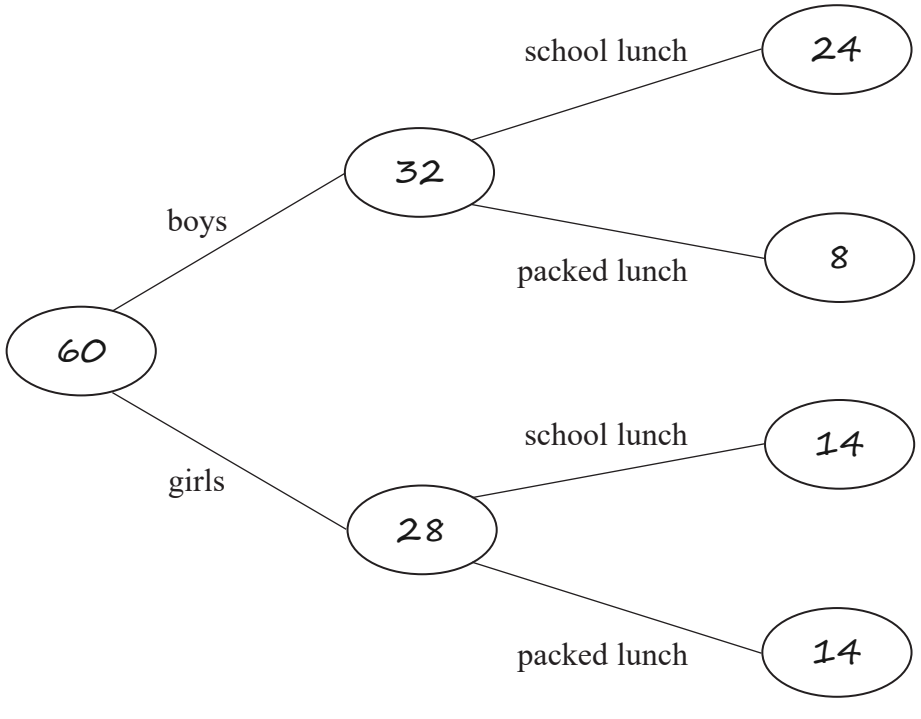

Girls = 60 − 32 = 28

**1 mark**
Place 60 and 32.

Boys school = 32 ÷ 4 × 3 = 24; packed = 8

**1 mark**
Find ¾ of 32.

Girls packed = 28 ÷ 2 = 14; school = 14

**1 mark**
28 girls; half have packed lunch.

**1 mark**
Complete all frequencies.

**(Total for Question 16 is 4 marks)**
