29 *PQR* is a right-angled triangle.

Work out the size of the angle marked *x*.
Give your answer correct to 1 decimal place.

$\cos x = \text{adjacent} \div \text{hypotenuse}$

1 mark
Use cosine.

$\cos x = 5.2 \div 9.6$

$x = \cos^{-1}(5.2 \div 9.6) = 57.2028...°$

$x = 57.2°$ (1 decimal place)

1 mark
Inverse cosine in degree mode.

°

(Total for Question 29 is 2 marks)
