2 The scatter graph shows the age and the value of each of ten cars of the same make and model.

1 mark
Single line through the trend.

(a) Describe the relationship between the value of a car and the age of the car.

As a car gets older, its value tends to decrease.

1 mark
Describe both variables.

(1)

(b) Draw a line of best fit on the scatter graph.

(1)

It may not be reliable to use the line of best fit to predict the value of a car that is 10 years old.

(c) Give a reason why.

10 years is outside the range of the observed ages.

This would be extrapolation beyond the data.

(1)

1 mark
The observed cars are only 1 to 7 years old.

(Total for Question 2 is 3 marks)
