9 Here is a rule for working out the area of a rhombus.

> Multiply the lengths of the diagonals together
>
> and then divide by 2

A rhombus has diagonals of length 6 cm and 8 cm.

(a) Use the rule to work out the area of this rhombus.

$6 \times 8 \div 2 = 24 \text{ cm}^2$

1 mark
Apply the rule.

..... cm^2
(1)

A different rhombus has an area of 30 cm^2
One of the diagonals of this rhombus has a length of 5 cm.

(b) Work out the length of the other diagonal.

$30 \times 2 = 60$

$\text{Other diagonal} = 60 \div 5 = 12 \text{ cm}$

1 mark
Undo ÷2,
then divide by 5.

1 mark
12 cm.

..... cm
(2)

(Total for Question 9 is 3 marks)
