15 c is inversely proportional to d.
$c = 0.5$ when $d = 6$

Find a formula for c in terms of d.

Inverse proportion: $c = \frac{k}{d}$

1 mark
Constant product cd.

$k = cd = 0.5 \times 6 = 3$

1 mark
Find k = 3.

$c = \frac{3}{d}$

1 mark
c = 3/d.
