9 Here is some information about the population and the land area of England, Scotland and Wales in 2016

	Population	Land area (km^2)
England	5.5×10^7	1.3×10^5
Scotland	5.4×10^6	8.0×10^4
Wales	1.9×10^6	2.1×10^4

(a) Calculate the total population of England, Scotland and Wales in 2016

55 000 000 + 5 400 000 + 1 900 000

= 62 300 000

1 mark
62 300 000 people.

.....

(1)

(b) Calculate the average number of people per km^2 in England, Scotland and Wales in 2016
Give your answer correct to the nearest whole number.

Total area = 130000 + 80000 + 21000

= 231000 km^2

1 mark
Total all land areas.

People per km^2 = 62300000 ÷ 231000

= 269.696969... ≈ 270

1 mark
Population ÷ area.

1 mark
270 people per km^2.

.....

(3)

(Total for Question 9 is 4 marks)
