19 The table shows some information about the ages of 70 people.

Age (a years)	Frequency
$20 \leqslant a < 30$	15
$30 \leqslant a < 40$	21
$40 \leqslant a < 50$	25
$50 \leqslant a < 60$	7
$60 \leqslant a < 70$	2

(a) Find the class interval that contains the median.

70 values: median uses positions 35 and 36.

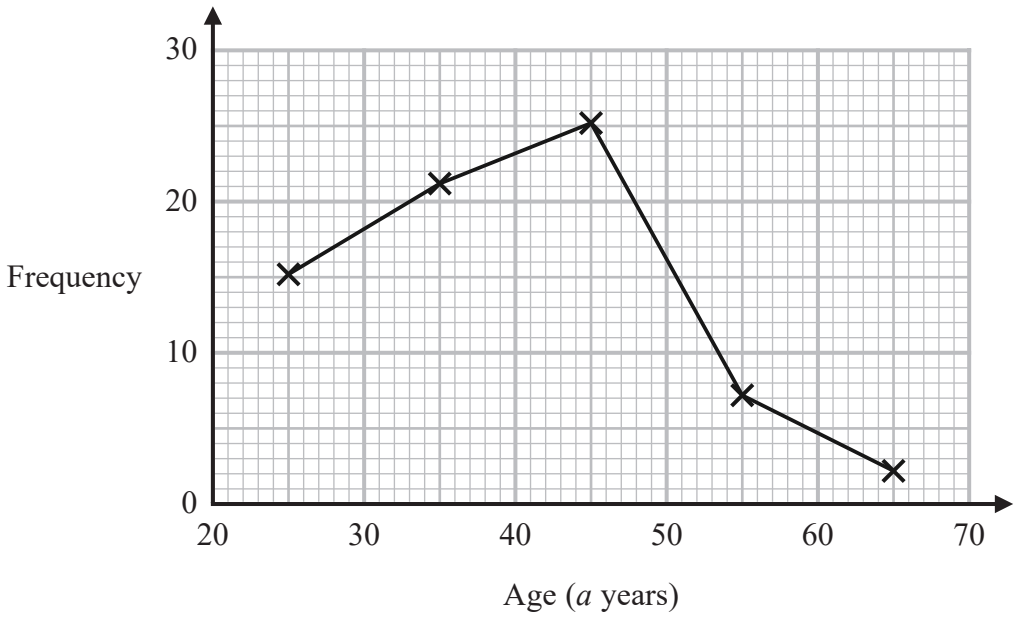

Cumulative frequencies: 15, 36, 61, 68, 70.

$30 \leq a < 40$

1 mark
Both positions lie in the second class.

(1)

(b) Draw a frequency polygon for the information in the table.

2 marks total
Plot the five class midpoints and join with straight segments.

(2)

(Total for Question 19 is 3 marks)
