12 Write $0.1\dot{3}\dot{6}$ as a fraction in its simplest form.

Let $x = 0.1363636...$

1 mark
Write the recurring decimal.

$10x = 1.363636...$

$1000x = 136.363636...$

$1000x - 10x = 136.363636... - 1.363636...$

1 mark
Align recurring tails and subtract.

$990x = 135$

$x = \frac{135}{990} = \frac{3}{22}$

1 mark
Simplify the fraction.

.....

(Total for Question 12 is 3 marks)
