16 Beena has a holiday in a villa in France.
The total cost of her travel is £349

Beena is on holiday for 2 weeks.
The cost of the villa is 650 euros per week.

While on holiday, Beena has 7 art lessons.
The cost of each art lesson is 45 euros.

Using an exchange rate of 1.12 euros = £1

(a) work out the total cost of Beena's travel, villa and art lessons.
Give your answer in pounds (£).

Villa: 2 × €650 = €1300

1 mark
Find total villa or lesson cost.

Art lessons: 7 × €45 = €315

Total in euros = 1300 + 315 = €1615

1 mark
Convert euros to pounds.

	EUR	GBP	
×100	1.12	1	×100
	112	100	

1615 ÷ 112 × 100

= £1441.964285...

Total = 349 + 1441.964285... = £1790.96

1 mark
Add travel in pounds.

1 mark
£1790.96.

£.....

(4)

(b) If there had been more euros to £1, how would this affect your answer to part (a)?

The total cost in pounds would decrease:

each euro would cost fewer pounds.

1 mark
The £349 travel cost stays the same.
