26 Solve the simultaneous equations

$$x + 2y = 4$$
$$2x - 2y = 5$$

$x + 2y = 4$ (1)

$2x - 2y = 5$ (2)

Add (1) and (2): $3x = 9$

1 mark
Eliminate y by addition.

$x = 3$

Substitute into (1): $3 + 2y = 4$

1 mark
Substitute x = 3.

$2y = 1$, so $y = 0.5$

Check (2): $2 \times 3 - 2 \times 0.5 = 5$

1 mark
x = 3, y = 0.5.

$x =$ .....

$y =$ .....

(Total for Question 26 is 3 marks)
