16 Here is triangle ABC.

Calculate the value of x.
Give your answer correct to 3 significant figures.

By the sine rule:

$$\frac{\sin x}{8} = \frac{\sin 130°}{12}$$

1 mark
Pair opposite sides and angles.

$$\sin x = \frac{8 \sin 130°}{12}$$

1 mark
Rearrange; inverse sine.

$x = \sin^{-1}(8 \sin 130° \div 12) = 30.71022077...°$

$x = 30.7°$ (3 significant figures)

1 mark
30.7°.

(Total for Question 16 is 3 marks)
