17 Sarim is thinking of a number.

$\frac{2}{9}$ of Sarim's number is x

$\frac{3}{4}$ of x is 22.5

What is the number Sarim is thinking of?

Parts	x	
3	22.5	
		÷ 3
1	7.5	
		× 4
4	30	

Number = 30 ÷ 2 × 9 = 135

1 mark
¾ of x is 22.5, so x = 30.

1 mark
Undo two ninths.

1 mark
135.

(Total for Question 17 is 3 marks)
