16 Sami asked 100 people which types of film they liked from comedy (C), action (A) and science fiction (S).

The Venn diagram shows information about her results.

One of the people that Sami asked is chosen at random.

Given that the person likes science fiction, find the probability that this person also likes exactly one other type of film.

Science fiction total = 4 + 2 + 9 + 31 = 46

S and exactly one other type: 4 + 9 = 13

$\frac{13}{46}$

$\frac{13}{46}$

(Total for Question 16 is 2 marks)

2 marks total
Condition on the 46 science-fiction fans; exclude all-three region 2.
