13 You can use this rule to work out the total cost, in pounds, of hiring a cement mixer for a number of days.

> Multiply the number of days by 9 and then add 7.50

Markus hires a cement mixer for 3 days.

(a) Work out the total cost.

3 × 9 + 7.50 = 27 + 7.50 = £34.50

2 marks total
Multiply by 9, then add the fixed charge.

£ 34.50

(2)

Andy hires a cement mixer.
The total cost is £106.50

(b) Work out the number of days that Andy hires the cement mixer.

£106.50 − £7.50 = £99

£99 ÷ £9 per day = 11 days

2 marks total
Undo the fixed charge first, then divide by 9.

11

(2)

Chloe hires a cement mixer for y days.
The total cost is £T.

(c) Write down a formula for T in terms of y.

T = 9y + 7.50

2 marks total
Include both the daily cost and the fixed charge.

T = 9y + 7.50

(2)

(Total for Question 13 is 6 marks)
