15 y is directly proportional to x^3
$y = 108$ when $x = 3$

Find the value of y when $x = 5$

$y = kx^3$

1 mark
Write the model with constant k.

$108 = k \times 3^3 = 27k$

$k = 108 \div 27 = 4$

1 mark
Find k from the given pair.

When $x = 5$: $y = 4 \times 5^3 = 4 \times 125 = 500$

1 mark
Cube the new x, then multiply by the same constant.

$y =$ ..... 500 .....

(Total for Question 15 is 3 marks)
