14 Carol sells bikes.

In April, 60% of the 45 bikes she sold were electric bikes.

In May, $\frac{5}{8}$ of the 40 bikes she sold were electric bikes.

In June, she sold 28 electric bikes.

In which month did Carol sell the greatest number of electric bikes?
You must show all your working.

April: 45 × 60 ÷ 100 = 27 electric bikes

May: 40 ÷ 8 × 5 = 25 electric bikes

June: 28 electric bikes

28 > 27 > 25, so June has the greatest number.

1 mark
Compare numbers of bikes, not the percentages alone.

2 marks total
Find both missing counts; choose June.

(Total for Question 14 is 3 marks)
