16 20 students did a test.
The table gives information about their marks in the test.

Mark	Frequency
7	1
8	7
9	6
10	6

(a) Write down the modal mark.

The greatest frequency is 7, for mark 8.

8

(1)

1 mark
Mode is the MARK with greatest frequency.

(b) Work out the range of the marks.

10 – 7 = 3

3

(1)

1 mark
Range = highest mark – lowest mark.

(c) Work out the mean mark.

Total marks = 7×1 + 8×7 + 9×6 + 10×6

= 7 + 56 + 54 + 60 = 177

Mean = 177 ÷ 20 = 8.85

1 mark
Weight each mark by its frequency.

8.85

(3)

2 marks total
Divide by all 20 students, not the four mark categories.

(Total for Question 16 is 5 marks)
