24 In a sale, the normal price of a jacket is reduced by 15%
The normal price of the jacket is reduced by £19.50

Work out the normal price of the jacket.

15% → £19.50

1% → £19.50 ÷ 15 = £1.30

100% → £1.30 × 100 = £130

2 marks total
Find 1%, then the original 100%.

£ 130

(Total for Question 24 is 2 marks)
