15 *ABC* and *CDE* are equilateral triangles.

Prove that triangle *ACD* is congruent to triangle *BCE*.

AC = BC and CD = CE.

1 mark
Sides of each equilateral triangle are equal.

Angle ACD = 60° + angle BCD

Angle BCE = angle BCD + 60°

1 mark
Both included angles are equal.

Therefore triangles ACD and BCE are congruent by SAS.

1 mark
Two corresponding sides and the included angle agree.

(Total for Question 15 is 3 marks)
