22 *ABCD* is a trapezium.

Work out the length of *AB*.
Give your answer correct to 1 decimal place.

Vertical difference = 13.2 – 8.4 = 4.8 m

1 mark
Use horizontal width 6 m and vertical rise 4.8 m.

$AB^2 = 6^2 + 4.8^2 = 59.04$

1 mark
Pythagoras: AB is the hypotenuse.

$AB = \sqrt{59.04} = 7.683749\ldots\ m \approx 7.7\ m$

.....7.7..... m

1 mark
Round once, to one decimal place.

(Total for Question 22 is 3 marks)
