25

ABCD is a parallelogram.
EDC is a straight line.
F is the point on *AD* so that *BFE* is a straight line.

Angle *EFD* = 35°
Angle *DCB* = 75°

Show that angle *ABF* = 70°
Give a reason for each stage of your working.

Angle FAB = 75°.

Opposite angles in a parallelogram are equal.

1 mark
Find a correct angle

Angle AFB = 35°.

Vertically opposite angles are equal.

1 mark
Find both known angles in triangle ABF

Angle ABF = 180° – 75° – 35° = 70°.

Angles in a triangle add to 180°.

2 marks total
All values and reasons form a complete proof

(Total for Question 25 is 4 marks)
