3 (a) Simplify $3f \times 5g$

$3 \times 5 = 15$; keep both letters f and g.

1 mark
Multiply the coefficients and the variables

$15fg$

(1)

(b) Simplify $t \times t$

$t \times t = t^2$

1 mark
Two factors of t give t squared

t^2

(1)

(c) Simplify $\dfrac{2n + 6n}{2}$

$\dfrac{2n + 6n}{2} = \dfrac{8n}{2} = 4n$

1 mark
Collect like terms, then divide by 2

$4n$

(1)

(Total for Question 3 is 3 marks)
