9 Yesterday it took 5 cleaners $4\frac{1}{2}$ hours to clean all the rooms in a hotel.

There are only 3 cleaners to clean all the rooms in the hotel today.

Each cleaner is paid £8.20 for each hour or part of an hour they work.

How much will each cleaner be paid today?

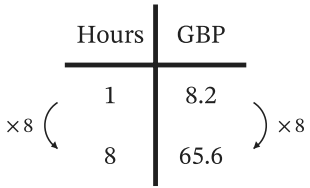

Total work = 5 × 4.5 = 22.5 cleaner-hours.

1 mark
Find the fixed amount of work

With 3 cleaners: 22.5 ÷ 3 = 7.5 hours each.

1 mark
Use inverse proportion to find today's time

Each part-hour is paid in full, so charge for 8 hours.

1 mark
Round the time up, then calculate pay

8 × £8.20 = £65.60

£ 65.60

(Total for Question 9 is 3 marks)
