12 2.5 kg of apples cost £3.60

Work out the cost of 3.5 kg of apples.

Find the cost of 1 kg, then multiply by 3.5.

1 mark
£3.60 ÷ 2.5 = £1.44 per kg

£1.44 × 3.5 = £5.04

1 mark
Correct cost

£ 5.04

(Total for Question 12 is 2 marks)
