13 (a) Complete the table of values for $y = \frac{1}{2}x - 1$

For each x: halve it, then subtract 1.

For example, x = −1 gives −0.5 − 1 = −1.5.

2 marks total
All four missing values correct

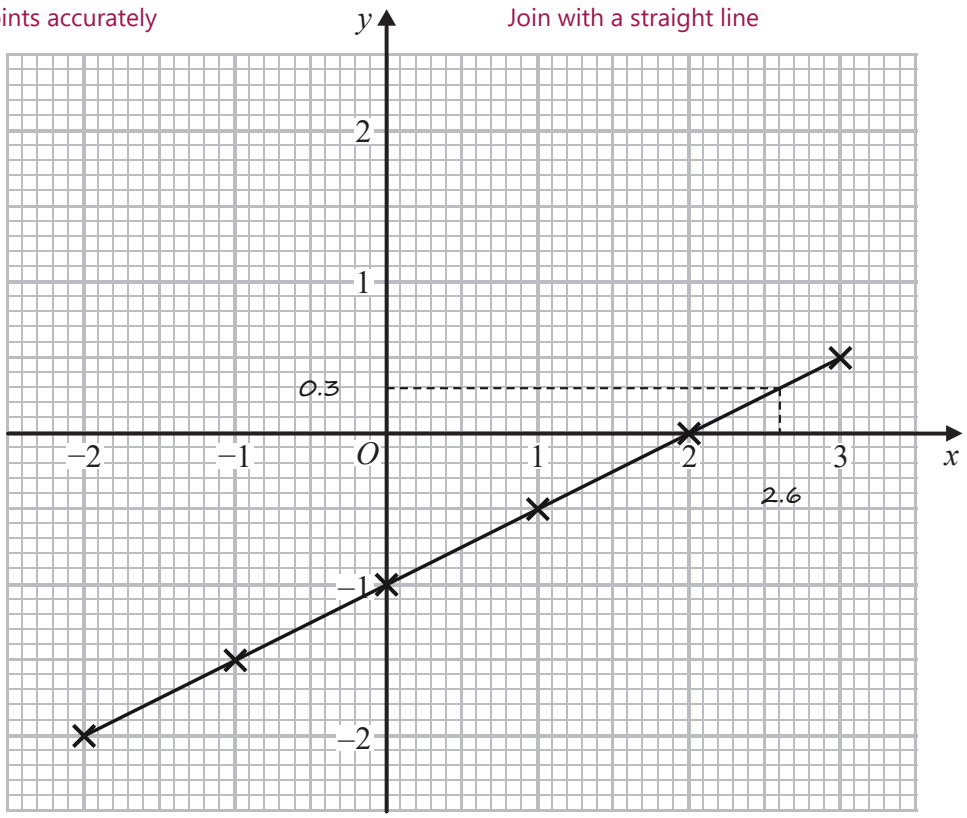

x	−2	−1	0	1	2	3
y	−2	−1.5	−1	−0.5	0	0.5

(2)

(b) On the grid, draw the graph of $y = \frac{1}{2}x - 1$ for values of x from −2 to 3

1 mark
Plot the points accurately

1 mark
Join with a straight line

(2)

(c) Use your graph to find the value of x when $y = 0.3$

Read across from y = 0.3, then down to the x-axis.

$x =$ 2.6

(1)

1 mark
x ≈ 2.6; accepted 2.5–2.7

(Total for Question 13 is 5 marks)
